We Proudly Present...

THE NEW BATES ASTRAL RANGE OF GLASSFIBRE MOTOR CRUISERS.

We offer the very latest in a long line of famous high quality cruisers to emerge from our yard at Chertsey. We feel confident that you will come to agree with us over the quality and style of this new range which combines high quality craftsmanship and design with outstanding interior layout and spaciousness all built into a robust and well proven hull.

The Astral hull can be fitted out into a variety of forms which enables the finished hull to be suited to the owners requirements. We at Bates, pride ourselves on our eagerness and ability to work with our customers in order to produce boats of which both parties can be justly satisfied.

The Specifications in this brochure are correct at time of going to press and may be subject to alteration without notice.

Basic Hull Options

810 ASTRAL

L.O.A.	26ft 7ins (8.10m)
Beam	9ft 6ins (2.09m)
Draft	2ft 6ins (0.75m)
Height (from waterline to helm shelter roof)	8ft 3ins (2.05)
Fuel Capacity:	30 gallons
Freshwater:	70 gallons
Weight (approx):	3–3.5 tons

The finished vessel will be suitable for inland or coastal use according to the engine option chosen. We recommend Volvo or BMC powerplant(s) in either petrol or diesel form as the customer desires. The 810 Astral is fitted with a glassfibre helmshelter roof and is available with an aft cabin which provides an extra 2 berths. Tunnel drive is usual with single engine installations but the twin engine layout will require outdrives to be fitted.

810 SPORTS

Similar in specification to the 810 Astral but this model is fitted with a removable cockpit canopy enabling the after section to be completely opened to the sun. A larger fuel tank capable of holding 70 gallons is standard on the Sports. (optional on the 810 Astral) This model is usually fitted with twin engines and hence sacrifices the aft cabin.
