No. of Berths	4
No. of Cabins	2
Constructional materials	Glass reinforced plastics
Hull form	Shallow Vee
Type of engine	Outboard or Inboard
Installation	Single

### Comments

The Dawncraft 25 has been specially designed with the feminine half of the crew in mind. She has a 10ft long galley with a worktop running from bulkhead to bulkhead. The cupboards underneath have sliding doors and enough shelves for a fortnights provisions. The dinette has four inch deep cushions and converts to a wide, double berth at night. Sliding windows bring light and fresh air into all parts of the large cabin. The two forward berths are separated at night by shutting the folding space-saver door. The outboard or inboard motor is fitted on an inboard transom and is protected on each side by deep lockers. The whole stern assembly is decked over for convenience and motor noise is reduced to a minimum. A centre cockpit version is also available.
