The Dawncraft "27"

Every skipper sooner or later longs for the sheer professional elan of the centre cockpit cruiser. To be in command amidships with finger tip control of the wheel, hand on throttle and the engine, way behind, responding instantly to your touch, this is the life! With half an eye on the skippers you glide the bows into a lock with a pilot's precision and come alongside with consummate ease. Say no more! Centre cockpit skippers are a superior breed of men and the DAWNCRAFT 27 confers membership of this exclusive club.

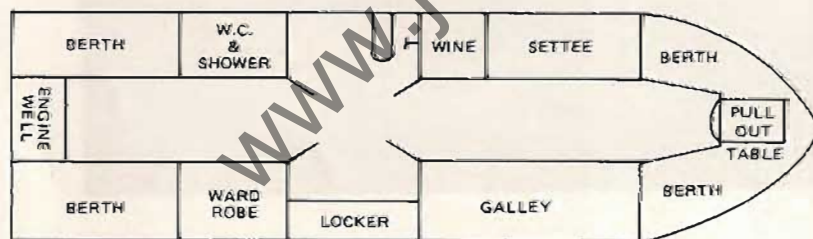

The whole design of this boat is to give 2 or 4 berth cruising in as much comfort as possible. With the aft cabin being used as a "bedroom" whilst the forward cabin is the "lounge".

In the forward cabin, two full size berths are situated up in the bows, and a pull out table between these berths allows four people to dine in comfort. The full size galley with sink, drainer, cooker with oven and lots of cupboards leaves nothing to be desired in the cooking department. Whilst in the relaxing department a settee is situated right next to the drinks cabinet so that after a hard day's cruising you can refresh yourself without expending too much energy.

The aft cabin is fitted out with a large double wardrobe, a toilet/shower compartment and either one twin or two single berths. The choice of these depending upon whether you have an inboard engine mounted under the cockpit floor, or an outboard engine situated in the rear engine well.

Finally the cockpit can be completely enclosed with the hard top and PVC covers, or it can be completely open to make the maximum use of the summer sunshine. For any low bridges or tunnels which may be encountered, the whole of the windscreen folds flat, so we think there is nowhere on the inland waterway system where this boat cannot cruise.

LAYOUT NOT TO SCALE

Length 27'
 Beam 6'10"
