Dolphin 19

The new **DOLPHIN 19** is a really handsome craft, it sets the standard for accommodation in family cruisers under 20 foot, whilst having the flexibility to slide across the water at high speed or to drift peacefully at a lower power as you enjoy the sunshine.

Access to the cabin is through a double hinged door with large sliding hatch above, which can be removed to allow standing headroom at the galley unit on the portside. Starboard is the toilet compartment, a rare luxury in a boat of this size. Plus the seating arrangement converts into a double berth.

The cockpit is designed in two versions – as standard with an outboard well including a seat either side (illustrated on the DOLPHIN 16), or at extra cost the outboard bracket version is available which extends the cockpit providing space for a large 'U' shaped seating area – infill cushions create a sunbed/double berth as shown.

Layout of Outboard Bracket Version

SPECIFICATIONS

Length:	5.70m
Beam:	2.06m
Weight (without engine):	600kg
Max. power:	60h.p.
Max. power with outboard bracket:	40h.p.
