

versatile for coast or inland

# Dolphin 19

## Cruise in Comfort

The Dolphin 19 sets the standard for accommodation in family cruisers under 20 feet.

Access to the cabin is through a double-hinged door with large sliding hatch above. Remove the hatch and you've got ample standing headroom at the galley unit on the port side where you can prepare your food.

Starboard is the toilet compartment, a rare luxury in a boat of this size. Fore, the seating in the V can be easily converted to provide a good-sized double berth.

The Dolphin 19 is fitted with a small bathing platform, which also provides a transom mount for an outboard engine.

With the engine mounted externally, the cockpit is considerably larger than many similar craft, providing more room for you and your crew. The rear of the cockpit is fitted with a bench seat which can be extended to make a sunbed or even a small berth for up to two children.

An inset engine well version is available if you might wish to use the 19 with a more powerful outboard.

The helm is to starboard and a helm seat is fitted, as is a passenger seat to port. The windscreen and side windows are toughened glass in aluminium frames and all rails are stainless steel, therefore giving an almost maintenance free exterior.
