

# Microplus 4+2

The Microplus 4 + 2 is a 21' x 8' 2" 4/6 berth cabin cruiser with standing headroom.

The large cabin accommodates starting from the bow -

1. Two berths with optional double berth conversion which during the day-time doubles as an attractive table.
2. On the port side a double berth/dinette area.
3. On the starboard side a stainless steel sink with a water system and space for the optional cooker with grill and oven.
4. Again on the starboard side there is a completely enclosed toilet.
5. On the port side behind the dinette area is a useful hanging area for your clothes.
6. The cabin is fully lined.

In the cockpit area there is a very useful amount of space. A Helmsman seat

is provided as standard and two extra folding berths can be fitted making the boat a full six berth cruiser. There is an enormous amount of stowage under the cockpit floor. A built-in gas locker, (accepts 2 x 10lb bottles) ventilated overboard, is fitted as standard. The windscreen is a fold-down screen and is part of the standard specification of the boat.

A very large canopy that gives standing headroom is one of the many optional extras.

The Microplus 4 + 2 must be one of the largest 21' boats afloat - its construction is to the usual high Shetland standard.

Please see the price list for the detailed specification of this boat and the list of optional extras.

A lot of boat for your money.
