# RLM 27 SEYCHELLES

**THE SEYCHELLES**, being 27' long, is the smallest of our range of craft, but the standard of workmanship and the quality of finish is identical to that found in our larger boats. All craft are built with twin keels and Z drive engine installations. Each boat is individually built by a team of craftsmen using teak veneers and solid timbers of Iroka. There are two options on layout - a completely open plan craft, or a two cabin layout with a solid door separating the forward two single berths. In the main cabin there is an L shaped dinette with a half flap table, which

converts to a double berth; a cocktail cabinet, and a large full length hanging wardrobe. The 6' galley incorporates the cooker complete with oven and grill, refrigerator, and water heater, which gives hot and cold pressurized water to both galley sink and the toilet compartment. Standard fittings in the good sized toilet include shower and washbasin set into a vanity unit.

**THE COCKPIT** offers a large rear seat which can also be used as a fifth berth, and from the helm there is good all round vision. Water tanks hold 60 gallons, whilst fuel is 35 gallons per engine. There is a good range of upholstery and carpet alternatives and white curtains are hung as standard. Standard equipment includes: — stanchions and lifelines, cockpit hood, helmsman seat, echo sounder, compass, electric bilge pump, shower, windscreen wiper, antifouling, anchor and anchor chocks, ropes, fenders and boat-hook.
