Standard equipment:

Windows, mattresses, fendering, Teleflex steering, cockpit canopy, deck fittings, windscreen, handrails, helmsman's seat etc.

Other 536 models:

SUNTRIP

SAFETY FIRST

Comments

The Seasport is the latest of the new 536 range. The very popular layout gives the entire crew the feeling of togetherness — without a bulkhead, it is best described here in the U.K. as "open plan". The interior provides for two full size berths under the hard-top with an optional double berth conversion. A helmsman's seat or an additional berth on the portside, would give seating for three, or a comfortable "sun-berth" in the cockpit area. Like all the 536 range the Seasport is exceptionally stable and full upright flotation more than meets the safety requirements of most countries. world.
