

Stonar Marine Limited

Manufacturers of the *Microplus* and *Buckingham* range of boats

Microplus 503 Range - 503-503GT

Specification

Microplus 503 Range

The Microplus 503 range includes the 503 cabin version and 503 GT version.

The range based on a length of 16'6" with a beam of 6'10" presents a unique combination of spaciousness and adaptability in small boat design.

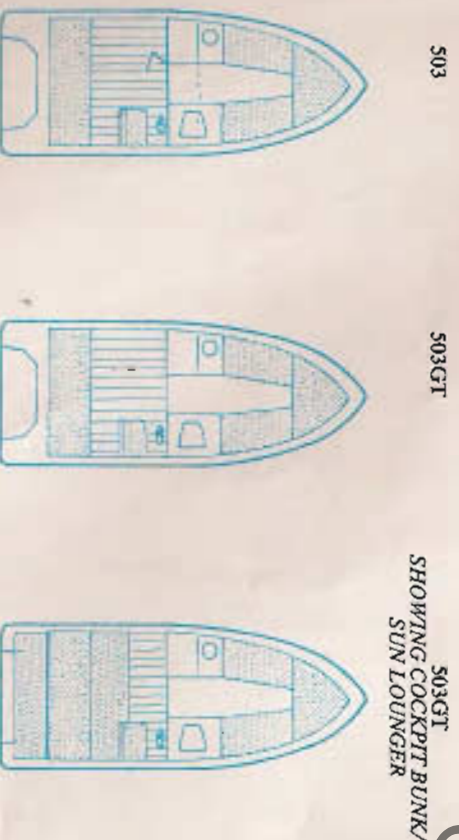

The bright roomy cabin is well lit and ventilated, the comfortable seats and mattresses convert at night to single beds or with the addition of the optional centre mattress to a double bed. For meals an optional table fits neatly between the seats and converts to the double bed. A feature of the cabin is the amount of space provided. There is a built-in toilet locker with hinged lid that doubles as a useful workshop, and a large built-in locker providing ample space for a sink and washing facilities under a hinged worktop. The berths have useful storage compartments under. The cabin doors with access hatch above the doorway complete the cabin specification.

The roomy cockpit with full width moulded floor complete with drainage sump will sleep two under the optional canopy when fitted with the optional bunks. A clever feature of the bunks is that one section can be used to form a full width sunlounge across the engine well thus also providing an engine cover. There is ample space for two standard fuel tanks and separate stowage for battery and gas bottle. A hinged cooker flap is fitted and a cockpit table is also available.

There is no bulkhead in the GT version.

The broad high transomed hull with double engine well takes long shaft engines up to 70hp and with semi deep vee hull with deep vee bow gives smooth quiet passage through the water.

Technical Specification

DIMENSIONS		
Overall Length	Imp	Metric
Beam including Fender	16'6"	5030mm
Overall Height excluding windscreen	6'10"	2083mm
Overall Height including windscreen	5'1½"	1560mm
