Profile

The Sheerline range of Hand Crafted Motor Cruisers by Wroxham Marine Ltd.

Built under the personal supervision of Peter Applegate – owner of Wroxham Marine Ltd. – Sheerline Motor Cruisers have evolved to be second to none in their class for quality, style, comfort and technical excellence.

Each vessel is built employing the skills of traditional craftsmen using only the finest of materials and equipment.

The feel, the warmth and the beauty of hand crafted quality wood interiors exude an ambience rarely found in these days of mass production.

Whilst maintaining traditional skills and values, the latest concepts of design and innovative equipment have not been overlooked. Therefore all engineering and electronics are at the forefront of technology.

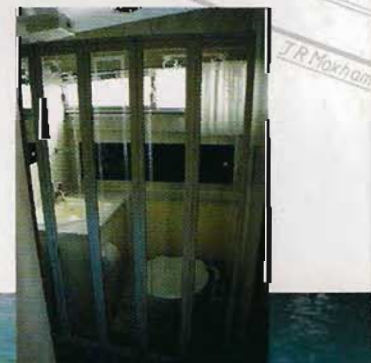

As each vessel is individually built, potential owners are invited to be closely involved with interior design and specification – resulting in a custom built boat – unique to the new owners requirements and delight.

This policy of custom build and continuous development could necessitate amendments to information in this brochure.

Creature comforts are important to enjoyment even in the marine environment. Therefore in every Sheerline the fabrics, decor, galley, heads and berths leave nothing to be desired. Even hot air heating, holding tanks and radio cassettes are standard fittings.

Each vessel is a joy to helm, quiet, sure and with fine response.

The priorities of Wroxham Marine Ltd. when designing and building Sheerline Cruisers are to bring together all that is best in quality, style and technical performance, resulting in many years of pleasure afloat for proud owners and full compliance with the requirements of both European legislation (CE Mark) and the Inland Waters boat safety scheme.

The Sheerline Range

1070 Finesse

Flagship of the fleet – the magnificent Sheerline 1070 Finesse all weather motor cruiser. Customer selected interior designs can vary from spacious four berth luxury to six berth accommodation for the family.

950 Finesse

The superb Sheerline 950 Finesse takes all weather cruising to higher levels of comfort and space than previously experienced on this size of vessel. The spacious comfort and ambience have to be experienced to be believed on both the four and six berth designs.

740 Finesse and Flair

Where a luxury cruiser of limited height above the water line or accommodation on a single level is a priority – look no further than the Sheerline 740. Choose from either the Finesse a four berth family cruiser or the Flair, a superb eight to ten seat day boat that converts to a most comfortable two berth cruiser for peace, tranquility or lively fun afloat.

950 Harmony and Ultimate

For those requiring a traditional aft cockpit layout with excellent cabin accommodation together with a large well appointed cockpit for open air al fresco living – the Sheerline 950 Harmony is the perfect solution. Benefiting from comfortable berths for up to six and excellent on board facilities, life afloat can be a dream come true. The mast, screens and cockpit canopy collapse for low bridge navigation.

An attractive up-grade of this fine vessel is the Sheerline 950 Ultimate with category C specification and twin engine option, making this a true coastal cruiser.

740 Harmony

The ever popular Sheerline 740 Harmony aft cockpit cruiser is probably the most highly specified in its class. Available with either a large wheelhouse for weather protection whilst enjoying an extended cruising season, or alternatively a large open cockpit protected by a high quality full canopy. Comfortable berths for two adults and two children, together with full on board facilities ensure many happy hours afloat.
