

Built by Shetland Boats Ltd.

	Feet	Metres
LOA	21'0	6.40
Draft	2'0	0.61
Maximum Beam	8'6	2.59
	Pounds	Kilos
Trailing weight excl. engine	2150	975
Berths	In Cabin 2 In Cockpit 2	
Constructional materials	Glass reinforced plastics	
Hull form	Shallow Vee	
Type of engine	Outboard	
Recommended engine hp.	Up to 35 hp.	

Other examples in range

Shetland 460 "Safety First"

Shetland 536 "Fisherman"

#### Builders comments

The new Shetland 640 has been designed for river and coastal cruising and gives comfortable accommodation for two people in two single berths in the cabin which can be converted to a double berth. Two smaller berths are provided in the cockpit and here again these can be converted to a double berth. Other features include fully enclosed toilet — large sink, cooker and galley space — hanging space for clothes — plenty of storage space. The first version will be suitable for outboard motors and later there will be a version suitable for diesel jet drive.
